-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4, 16 and 20-27, drawn to polarity reversal driving, classified in class 345, subclass 96.
  - II. Claims 5-15 and 28-35, drawn to graphics memory control, classified in class 345, subclass 545.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because driving a display with alternating polarity signals does not require particularities of the memory as claimed. The subcombination has separate utility such as RAM, which can be used in image processing without requiring to display the information contained in the RAM.
3. Because these inventions are distinct for the reasons given above and the search, for example, required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 2674

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. According to Requirement for restriction or election of species only (no action on the merits) the shortened statutory period of one month for reply is set forth in this Office action.

See MPEP § 809.02(a) and § 817.

### ***Improper Claims***

6. Please note that claims 17-19 are improper and cannot be treated on merits because they are multiple dependent claims, which are dependent on multiple dependent claim 15.

Appropriate correction is required. See MPEP § 608.01(n).
